GARDEN, FLOWER AND FIELD SEEDS

127 SOUTH TENTH STREET

LINCOLN, NEBRASKA

BUYING GOOD SEED

THE farmers who sow grass seeds are beginning to discover that there is a wonderful opportunity for buying a lot of weed seeds in with cheap grass seeds. It is very easy to save 25c or 50c an acre on the cost of seeds, and find to your sorrow that you have planted a bunch of weeds that will cost you \$25.00 an acre to get rid of, or maybe ten years time. If you want to save money on seed planting buy our very best grades and cut down on amount you sow—then you plant the largest and pepest seed you can get and you plant no weeds. We realize that it is hard to tell who is honest and who is not honest, but there is one way you can tell without cost whether or not our seed is good, and that is by getting it tested by the State Seed Department at Lincoln. If it isn't all that we claim for it, return it and get your money back along with the expenses that you are out.

Get away from the idea that we are making big profits, we are not. Most of our seed is sold on a less margin than groceries. Good high germinating clean seed costs more money, but you can sow less of it to the acre. Do that and the crop you do get will be free from weeds and will be big, vigorous, husky plants that live under adverse circumstances.

I have been in this game for over 30 years and I know seeds, but I haven't yet learned how to slip over screenings on to you and call it real seed. And I don't want to learn it. I want to give you just the very best seed I can for the money you pay.

Remember, "If you buy it from Gunn it's right."

Yours for better and purer seed,

Ed. S. Gunn

Standard Seed Tester

Many seed houses are willing to "take a chance" on their seed because "it looks like it would grow." We do not do that. We must know that it grows. We use the Standard Tester; it is like the one used by our own Nebraska Pure Seed Commission and by many of the State Experiment Stations. It tests all kinds of seeds, from the smallest (like cabbage) to the largest (like lima beans). Come in and see it work.

Instructions

OUR TERMS ARE CASH WITH ORDER

ONE GRADE ONLY—We quote only the best and highest grade. We do not believe in low grades. Better buy the best and sow the best.

SAFE ARRIVAL GUARANTEED—We guarantee all goods to reach you safely. For any loss have agent make notation on express bill and send it to us.

SUBJECT TO INSPECTION—Any seeds purchased from us may be submitted to any experiment station for test. If not satisfactory, return to us and your money will be refunded in full.

ORDER EARLY—Everything is going up. For this reason, we reserve the right to cancel prices when stock on hand is sold.

ERRORS—Keep a copy of your order. We might make a mistake, and if we do, just write us and we will make it right.

We Ship Incubators and Brooders Prepaid to Any Place in the United States.

About Bags

We use heavy 2½-bu. grain bags on Corn, Alfalfa, Clovers, Timothy, Red Top, Grains, Millets, Kaffir Corn, Milo and other Sorghums. They weigh 1 pound each. We do not weigh them in. These cost you 50 cents each. We refund full price if you return them.

Grasses are shipped in gunny bags, which are weighed in but are otherwise free.

OUR GUARANTEE

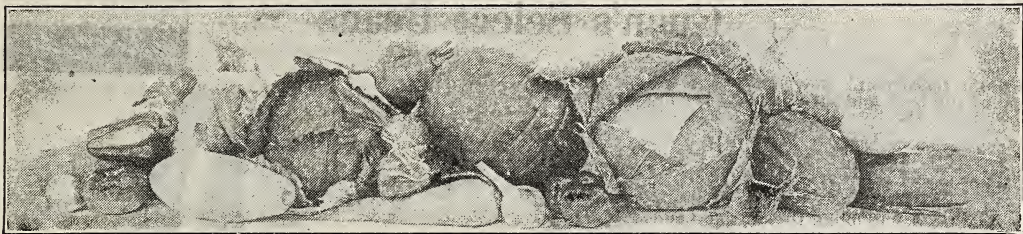

We are very careful in the handling of all our seed. We guarantee that our seed has been carefully tested and that we do not send out any but what shows a good growth. When you receive our seeds, test them any way you wish. If you are not satisfied, return them any time within two weeks and we guarantee to refund to you all the money you are out.

We do not guarantee the crop in any way, because we cannot plant your seed or control weather conditions. This guarantee means just what it says.

GUNN SEED CO., Ed S. Gunn.

We pay postage or express charges on garden and flower seeds when sold at catalog prices.

Prices on all grass and field seed and potatoes are subject to change. Price sheets give latest prices. Give us a nice tryout this year.

Select Garden Seeds

Asparagus

Stock Beets

The best way to get a stand of Asparagus is to set out the roots.

ASPARAGUS ROOTS—Large, 2-year-old roots. 25 for 35c; 100 for \$1.10, postpaid.

MARTHA WASHINGTON—The new non-rusting, most perfect Asparagus propagated by the U. S. Department of Agriculture. 2 year old roots, 25 for 60c; 100 for \$1.80.

Beets

One ounce sows 100 feet; 5 pounds, 1 acre. Soak seed 24 hours for quick growth. Our beet seed will give the very best results.

IMPROVED CROSBY'S EGYPTIAN—Skin and flesh very dark red, roots smooth, round, extra early, fine quality. Pkt., 10c; oz., 15c; 2 ozs., 40c; 1 lb., \$1.00, postpaid.

DEWING'S EARLY RED TURNIP—Flesh and skin very dark blood red; good for early winter use. Pkt., 10c; oz., 15c; 2 ozs., 40c; 1 lb., \$1.00, postpaid.

EARLY WONDER—A fine sized, extra early, deep blood red beet with very small tap root. Probably the earliest beet grown. Good for first or second planting. Pkt., 10c; oz., 15c; 2 ozs., 40c; 1 lb., \$1.00, postpaid.

EDMUND'S BLOOD TURNIP—A strain of great regularity in shape; deep blood skin and very dark flesh of best quality; splendid keeper. Pkt., 10c; oz., 15c; 2 ozs., 40c; 1 lb., \$1.00, postpaid.

Detroit Dark Red Beet

DETROIT DARK RED TURNIP—Small tops, smooth skin and flesh dark red, crisp, tender and sweet. Pkt., 10c; oz., 15c; 2 ozs., 40c; 1 lb., \$1.00, postpaid.

SWISS CHARD—Cultivated for its leaves, which are used for greens. Oz., 15c; ¼ lb., 50c.

All Beet packets 5c each.

At above prices we pay postage or express.

CORN-SAVER BEETS—This beet is well known over most of the U. S. It takes its name from the fact that when properly fed, it will actually save corn, probably more than half, and thus produce pork at a large saving. These beets will frequently grow to weigh 28 pounds and yield as much as 80 tons (160,000 pounds) to the acre. They contain a large amount of sugar and are good for all kinds of stock—especially cows, hogs, sheep and chickens. Price—Genuine Corn Saver, ¼ lb., 25c; 1 lb., 80c; 5 lbs., \$3.75; 10 lbs. (for 1 acre), \$7.00, postpaid.

MAMMOTH LONG RED IMPROVED—This is the heaviest yielding of all the Mangel Wurzel, a thousand bushels to the acre being quite a common yield; single roots sometimes weigh as high as 40 pounds each. Our Improved Mammoth Long Red produces large uniformly straight, well formed roots and can always be relied upon to produce a bumper crop of clean, sweet, crisp roots; just the kind of feed that cattle delight in. Try 5 or 10 acres.

GIANT SLUDSTRUP—Long, reddish yellow, grows well above the ground, and easy to pull. Is doubtless the best mangel in the world. No other crop can match it.

SUGAR BEET (Klein's Wanzleben)—This is considered the most desirable variety for sugar. It is also desirable for feeding to stock, and yields an immense crop on rich land. ¼ lb., 25c; ½ lb., 35c; 1 lb., 65c, postpaid.

GIANT HALF SUGAR MANGEL—Introducing this beet to our customers, we believe that the grower has established a strain of beets, which while giving nearly as large a yield of easily grown and harvested roots as a crop of mangels, supplies a food of very much higher nutritive value. The roots are red skinned, grow half out of the ground.

Prices on all Mangels except Corn Saver, ¼ lb., 25c; ½ lb., 35c; 1 lb., 60c, postpaid.

CULTURE—Sow as soon as the soil is warm, in rows 2 to 3 feet apart; cover about one inch. Thin the plants to about 10 to 12 inches apart in the rows. Sow 10 pounds of seed to an acre. If very dry, soak the seed 24 hours in lukewarm water. Harvest just before frost. Cut off the tops and store roots in cool cave or cellar. Cut up and feed 10 to 20 pounds per day. Mangels do not taint the milk.

As a succession crop or as a crop for winter use, beets cannot be too highly recommended. We urge every gardener to make several sowings.

Gunn's Select Beans

One pint to 40 feet. Sow every two weeks. Grown by one of the best and most careful Michigan growers.

Wax Beans

EXTRA EARLY WONDER WAX BEANS—Brings highest market prices, is a wonderfully heavy yielder, nearly rust proof, stringless and tender, in fact, fills every need. Belongs to the flat podded class and grows a strong plant, 18 inches high and two feet across. Well loaded with pods, five to seven inches long; slim, flat, plump, handsome and meaty. Quality tender, brittle and of fine texture. Comes into edible condition sooner than any other wax-podded sort. Practically rust proof; a bountiful yielder. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

GOLDEN WAX IMP. GRINNELL—One of the very best wax beans. Hardy, brittle and of the best quality. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

BLACK WAX PENCIL POD—Pods round, very early, very prolific, a golden yellow and of fine flavor. Ready for table in about forty days. Our strain is exceptionally productive; very hardy, reliable and of the best quality. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

DAVIS' KIDNEY WHITE WAX—Very productive, long pods, very handsome, rustless. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

WARDWELL'S KIDNEY WAX—Strong-growing vines, yield a large crop of long, nearly straight, very white wax-like, handsome pods of good quality. It matures about the same time as the Golden Wax. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

Green Pod Dwarf Beans

WHITE NAVY— $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

BURPEE'S STRINGLESS GREEN POD—Pods are stringless and of a beautiful fleshy appearance. Ready to market earlier than Red Valentine. This Bean is of great value, not only to the market gardener and canner who plants for profit, but also for the amateur who seeks the finest quality for home table. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

BURPEE'S FORDHOOK FAVORITE—A new white seeded Stringless Green Pod, three to five days later than the original. Pods $5\frac{1}{2}$ to $6\frac{1}{2}$ inches long. A good shell bean. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

LONG YELLOW SIX WEEKS—Full flat green pods. Pt., 30c; qt., 50c; 2 qts., 95c.

EXTRA EARLY RED VALENTINE—Early strain of this popular round pod bean. Pt., 30c; qt., 50c; 2 qts., 95c.

RED KIDNEY—Green pod, with large, deep red Kidney Beans. Pt., 30c; qt., 60c; 2 qts., \$1.15.

Dwarf Lima Beans

BURPEE BUSH LIMA—A bush form of the large Pole Lima; very productive and its dwarf character is well established. Pkt., 5c; pt., 35c; qt., 65c; 2 qts., \$1.25.

HENDERSON BUSH LIMA—Productive; a very early small bean. Pkt., 5c; pt., 35c; qt., 65c; 2 qts., \$1.25.

Pole Beans

GOLDEN CLUSTER WAX—This pole bean bears large clusters of golden-yellow pods 6 inches to 8 inches long, which are of delicious flavor. Seed is white. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

CUT SHORT OR CORN HILL—Used for planting among corn; one of the best. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

Kentucky Wonder Pole Bean

KENTUCKY WONDER—Long, tender, green pods of most excellent flavor. Heavy yielder, (brown seed). $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

WHITE KENTUCKY WONDER—The Kentucky Wonder white is an improvement on the old style pod Kentucky Wonder. This variety is very early and excellent in quality. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

LARGE WHITE LIMA OR BUTTER—Largely grown and highly esteemed. $\frac{1}{4}$ pt., 10c; pt., 35c; qt., 65c; 2 qts., \$1.25, postpaid.

Chives or Schnittlouch

A hardy plant belonging to the onion family. Tops used for flavorink soups. Seed, pkt., 10c. Plants, 25c clumb, postpaid. By express, \$1.50 per doz.

Plan to plant a Home Garden this year. Healthful exercise taking care of it, besides the joy of having fresh vegetables at all times.

Gunn's Cabbage

Ready for use in 100 days from seed planting.

Early Varieties

EARLY JERSEY WAKEFIELD—Best American grown seed; best extra early, solid conical heads. Pkt., 5c; oz., 25c; 2 ozs., 45c; ¼ lb., 75c; lb., \$2.35, postpaid.

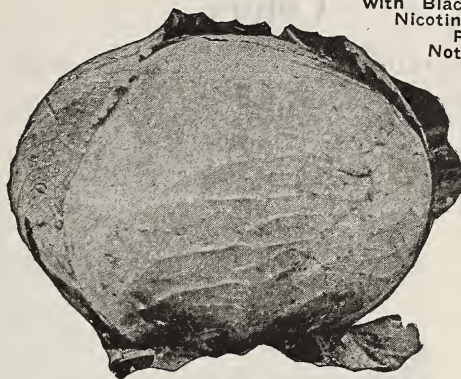

Second Early Varieties

ALL SEASONS—Best American grown seed; one of the finest, growing to a large size quickly. Pkt., 5c; oz., 25c; 2 ozs., 45c; ¼ lb., 75c; lb., \$2.35, postpaid.

SURE HEAD—Best American grown seed; a superior sort. Produces large and solid heads of fine quality. Pkt., 5c; oz., 25c; 2 ozs., 45c; ¼ lb., 75c; lb., \$2.35, postpaid.

Main Crop

PREMIUM LATE FLAT DUTCH—We offer a remarkably fine strain; a sure, solid header. Pkt., 5c; oz., 25c; 2 ozs., 45c; ¼ lb., 75c; lb., \$2.35, postpaid.

Copenhagen Market

COPENHAGEN MARKET—The originator says: "Our 1910 novelty. This new, earliest of all ball-shaped cabbage is unrivaled as the most equally maturing and large-heading early cabbage in existence. Remarkably solid, of fine quality, with small cores and an average weight of 10 pounds. Often weighing 16 pounds." ½ oz., 25c; oz., 40c; ¼ lb., \$1.25.

Frost-Proof Cabbage Plants

Will Mature Heads Two to Three Weeks Earlier Than Your Home Grown Plants and Double Your Profits.

Grown where the soil and climate conditions are just suited for producing tough, hardy cabbage plants during the Winter and early Spring, these plants make a slow but steady growth, until at eight to ten weeks of age they are very tough and hardy. When in this condition they can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants. These plants will stand a temperature of 20 degrees above zero without injury. The land freezing, or the plants being covered with ice, sleet or snow after they are planted will not injure them, providing temperature does not go below 20 degrees above zero. The top of the plant does not grow until your regular Spring weather opens up, but the roots grow from the time they are planted, and just as soon as spring weather starts, the established root growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed cabbage two to three weeks sooner than you can mature them from hot bed and cold frame plants.

Varieties: Early Jersey Wakefield, Charleston Large Type Wakefield, Succession and Early Flat Dutch.

Prices by Parcel Post, postage paid. In lots of 100, 200, 300, or 400 plants at 50c per 100 plants; 500 plants for \$1.75; 1000 or more at \$3.25 per 1000 plants.

Orders are filled by the 100, not 250 or 350. These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another variety you would pay at the 100 rate.

Prices by Express, buyer paying express charges. In lots of 1000 to 3000 plants at \$2.00 per 1000; 5000 or more at \$1.50 per 1000. Plants packed for express shipment, 1000 or 2000 plants of a variety to package, they weigh about 25 pounds per thousand plants, packed for shipment.

Order Early to Get Plants Delivered In Time
When we receive your order for these plants, we have to forward it to our growing station which takes several days. Plants are shipped direct to you from growing station. Plants cannot be pulled or shipped when beds are wet. We sometimes have a week or ten days of continued wet weather which prevents shipment. If you do not receive your plants as soon as you expect them, you will know that weather prevents shipment. Send your order two to three weeks before you expect to set the plants and you will get them on time.

Flat Dutch Grown From Plants

Carrots

One ounce sows 100 feet. Four pounds per acre. Grown under contract for us in California. None better.

RED—Pt., 20c; qt., 30c.

YELLOW—Pt., 20c; qt., 30c.

Onion Plants

Onion plants are fast taking the place of onion sets. They are practically as cheap, make young onions that are just as good or better than the sets and if left in the ground make a large, very sweet tasting white onion bulb, measuring from 3 to 5 inches across. One thousand plants equals eleven quarts of sets. One thousand plants will produce from 7 to 10 bushels of onions. Price, 30c per 100; \$2.50 per 1,000, postpaid. 7,500, one crate, prepaid express, \$9.00.

Gunn's Selected Peas

Our Peas are grown for us in Northern Michigan by an expert pea and bean grower. All fields are carefully rogued, and there is none better.

Extra Early

LINCOLN—A very fine extra early Dwarf wrinkled variety, growing from 1½ to 2 ft. high. Yields extra heavy. The large dark pods contain 8 or 9 extra sweet big peas. Especially good for market gardeners as well as the home gardener. Pkt., 50c; qt., 95c; 2 qts., \$1.80, postpaid.

ALASKA—Height, 2½ feet. Very early and exceedingly uniform in maturing its crop. The vines are very productive, bearing four to seven pods, which are filled with medium sized, bright, bluish-green peas of good flavor. ¼ pt., 15c; pt., 40c; qt., 75c; 2 qts., \$1.40; gal., \$2.75, postpaid.

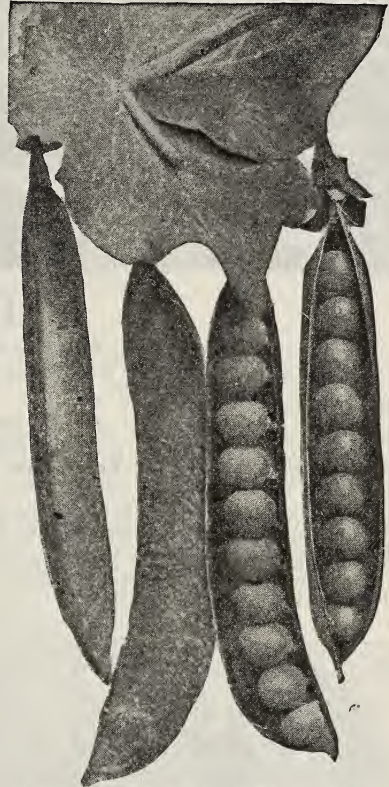

FIRST AND BEST—Thirty inches. Very early; popular for market and shipping. ¼ pt., 15c; pt., 40c; qt., 75c; 2 qts., \$1.40; gal., \$2.75, postpaid.

THE AMEER OR MAMMOTH ALASKA—Thirty-six inches. This new variety resembles the Alaska, the vine being more vigorous, a little taller, and the pods and peas are fully one-third larger. It is a heavy producer, with handsome, dark-green pods, containing from 5 to 7 large, blue-green, round peas of excellent quality. The crop ripens uniformly, about 3 days later than Alaska. We can recommend this to gardeners as the most prolific pea for early planting. Postpaid, ¼ pt., 15c; pt., 40c; qt., 75c; 2 qts., \$1.40; gal., \$2.75, postpaid.

THOMAS LAXTON—A very popular early variety. Height 2½ feet; vine and foliage moderately stout, medium green; pods medium green 3½ in. long, straight, nearly round and square ended, containing 7 medium dark green peas of superior quality. Pt., 50c; qt., 95c; 2 qts., \$1.80, postpaid.

MAMMOTH PODDED EXTRA EARLY—Thirty-six inches. The mammoth of the garden in size of pod and is an exceedingly heavy bearer; peas of the most delicious flavor. It grows, when "staked" or "brushed," from 3 to 4 feet high. Foliage, pod and vine of a rich, dark green color, showing vigor and makes a rapid, healthy growth. Pods well filled with extra large peas of fine flavor. Began bearing with us in 31 days from planting; lasts for 3 or more pickings. ¼ pt., 10c; pt., 45c; qt., 80c; 2 qts., \$1.55; gal., \$3.00, postpaid.

All Peas, pkt., 10c.

Mammoth Podded Extra Early Peas

Dwarf Early Peas

GUNN'S EXCELSIOR—Sixteen inches. This is an improvement over Nott's Excelsior. Just as sweet; a few days earlier; better bearer, larger pods. ¼ pt., 15c; pt., 40c; qt., 75c; 2 qts., \$1.40; gal., \$2.75, postpaid.

NOTT'S EXCELSIOR—Twelve inches. An improvement on American Wonder. ¼ pt., 15c; pt., 40c; qt., 75c; 2 qts., \$1.40; gal., \$2.75, postpaid.

Peanuts

THE JUMBO VIRGINIA is the large podded peanut sold in candy and grocery stores. It requires a rather rich soil; yields heavily under favorable conditions; does not do so well under dry farming conditions, for if the growth is checked for several weeks, there is not time enough after the fall rains for this variety to fill. 30c per lb.; 2 lbs., 55c, postpaid. 10 lbs., or more, 25c per lb., at your expense.

Ask for prices on larger quantities.

Gunn's Radishes

One Ounce to 100 Feet; 9 to 10 Pounds to Acre. Ready in 18 to 45 Days.

Our Radish Seed is either French or Michigan grown. Both are considered about equal. California seed grows larger leaves.

Gunn's Colossal Tomato

One Ounce to 1,500 Plants; One-Quarter Pound to Transplant an Acre.

Our Tomato Seed is grown by two tomato specialists. Their business is growing tomato seed. Cheap tomato seed comes from the leavings of canning factories.

JOHN BAER—This new, wonderful, much-talked-of tomato produces perfectly solid, almost round fruit in 30 days. Fruit grows in clusters with from 50 to 100 on each plant. The fruit ripens evenly and practically every one perfect. It has a beautiful bright red color, most delicious, sweet flavor; genuine stock. Pkt., 5c; oz., 35c; 2 ozs., 65c; ¼ lb., \$1.15; lb., \$4.10, postpaid.

EARLIANA—None earlier, good size, deep red, fine quality, very productive. Pkt., 5c; oz., 35c; 2 ozs., 65c; ¼ lb., \$1.15; lb., \$3.60, postpaid.

DWARF CHAMPION—The original tree tomato. Fruit medium size, smooth and purplish pink. Pkt., 5c; oz., 35c; 2 ozs., 65c; ¼ lb., \$1.15; lb., \$3.60, postpaid.

GOLDEN QUEEN—Best of the large sized yellow tomatoes. Fruit smooth and of the best quality. Pkt., 5c; oz., 35c; 2 ozs., 65c; ¼ lb., \$1.15; lb., \$3.60, postpaid.

COLOSSAL—The largest tomato of all, finest quality.

Great in size and productions; solid flesh, delicious flavor for eating sliced raw or canned. Cooking qualities cannot be bettered. Very few seeds; produces more fruit to vine than any other large kind. Pkt., 5c; oz., 35c; 2 ozs., 65c; ¼ lb., \$1.15; lb., \$3.60, postpaid.

YELLOW PONDEROSA—Fruit large and smooth; color a beautiful golden yellow, sometimes with a slight blush of red, as smooth and well-shaped as the best of the red varieties and of superior flavor. Oz., 60c; 2 oz., \$1.00; ¼ lb., \$1.75; lb., \$6.10.

CHALK'S EARLY JEWEL OR BONNIE BEST—The largest, smoothest, finest flavored, bright red early tomato grown. Pkt., 5c; oz., 35c; 2 ozs., 65c; ¼ lb., \$1.15; lb., \$3.60, postpaid.

PONDEROSA—The largest variety in cultivation. Oz., 60c; 2 oz., \$1.00; ¼ lb., \$1.75; lb., \$6.10.

STONE—Very large, perfectly smooth, fine bright scarlet; best main crop. Pkt., 5c; oz., 30c; 2 ozs., 50c; ¼ lb., 90c; lb., \$3.00, postpaid.

YELLOW PEAR—Sometimes called Fig Tomatoes. Best for preserves. Pkt., 10c; oz., 50c; 2 ozs., 85c; ¼ lb., \$1.50.

Turnips

One Ounce to 1,500 Feet of Drill; 2 to 3 Pounds to Acre.

Tobacco

CONNECTICUT SEED LEAF—Used for wrappers and home use. Pkt., 10c; oz., 40c, postpaid.

HAVANA—Finest strain of imported seed. Pkt., 10c; oz., 40c, postpaid.

Potatoes

Certified

RED RIVER OHIO—There is a lot of difference in the Red River Ohio potatoes. Some of the so-called Red River Ohio were never grown anywhere near the Red River Valley, and some that have been grown there were grown by growers who are careless, and the seed stock is very scabby and knotty. Our stock was grown near Canadian line, is certified as to purity and freedom from disease and carries the official sealed label.

Big Yields from Minnesota Potato Seed

Minnesota-grown potato seed yielded nearly twice as many potatoes as seed produced in Iowa, according to experiments recently conducted at the Iowa State Experiment Station, Ames, Iowa.

Referring to this experiment, which was conducted in seven Iowa counties, Professor C. L. Fitch, who had charge of the work, says: "The northern seed produced 115 bushels of good table potatoes and the cornbelt seed 43 bushels, a difference of 72 bushels, worth at least \$100."

Bug Death

This is a powder used for killing any bug or worm that eats the foliage or flowers of a n y plant. It is absolutely harmless to plant or animal life, thus making it safe poison. Can be used dry or with water. Bug Death can be sent by mail. Price: Lb., 25c; 3 lbs., 40c; 6 lbs., 65c; 12 lbs., \$1.50.

Soy or Soja Beans

As a feed for live stock whether grown for the hay or the beans, threshed to feed with some other grains, its value cannot be overestimated. As a fertilizer, it is equal to clover. Any good corn soil will grow soy beans. The plant is not molested by insects of any kind, and heat and drouth do not affect it. The yield of beans is from 20 to 30 bu. per acre. When fed to milch cows, using 3 or 4 pounds of beans per day, along with other feed, the milk yield will be doubled. When grown for the beans they should be drilled in rows and cultivated like corn.

Plant With Corn—Use 6 lbs. to acre, planting in corn rows and let pigs hog it down. Chinch Bugs keep away from Soy Beans.

Ito San—See list for prices.

Manchu—See list for prices.

Black Eyebrow—See list for prices.

Cowpeas

Plant after it gets good and warm. Make very rich feed; also good to turn under for green manure. Fine sown with Kafir. One bu. to acre, 2 bu. if alone.

WHIPPOORWILL—The old standby.

See colored sheet for prices.

Millet

Golden Millet or German

Our seed stock originated in Tennessee, and produces the large headed, high growing kind. This grows very rank and is one of the best varieties for hay on account of being so sweet, palatable and milk producing.

Dwarf Essex Rape

Produces feed in from 6 to 10 weeks from sowing. Grows 2 to 4 feet high. Produces from 25 to 30 tons of green fodder to the acre. Sow 5 to 6 lbs. to acre. Good for chickens, calves, cattle, hogs, sheep. Makes milk "taste." Sow with oats. Sow with corn or alone at any time from March to July.

Spring Wheat

See yellow sheet.

Rosen Rye

This is the new Rye, developed by the Michigan Agricultural College. The berry is almost twice as large as the common rye and will usually yield twice as much to the acre. The yield in Michigan runs from 35 to 45 bushels per acre.

FOR SEEDS NOT LISTED

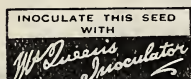

If there is any seed or tools you wish order and we will get them for you at same price or less than others quote.

Sweet Clover

Turns Sand into Loam—Fills the Soil With Nitrogen—Will Redeem Western Sandhills

Sweet Clover is practically as rich as alfalfa. It grows where alfalfa does not. It will not bloat any stock. It fills the soil with nitrogen. The roots decay every two years, filling the soil with humus. It grows on dry sandy soil. It grows on hard clay soils. Every piece of land that has been sown to Sweet Clover is made richer for it. It will not grow in cultivated land, nor will it become a nuisance. Fine for honey.

WHITE BLOSSOM—Grows a little taller and ranker than yellow.

YELLOW BLOSSOM—Makes seed earlier and not quite so much hay.

University Oats No. 1

YIELD—Under favorable conditions, Kherson Oats have yielded as high as 112 bushels to the acre in Nebraska. At the Experiment Station at North Platte, the yield averages about 50 bushels to the acre.

In good, favorable years, Kherson Oats are three weeks earlier than common oats, thus losing by two weeks the risk of hail and two weeks better chance for a crop.

Buy direct from us and you get the pure seed—no substituting.

White Kherson Oats

Just like the regular Kherson Oats, except berry is white in place of yellow. When ripe, are a beautiful white in color. They have fine, large sprangled or full heads, which frequently contain more than 100 seeds.

Onion Plants, see page 6.

Frost Proof Cabbage, see page 3.

Hulless Oats—Liberty 480

These hulless oats were originated and introduced by professor Saunders of the Department of Agriculture in Saskatchewan, Canada.

Our seed was grown in Nebraska, from seed shipped in from South Dakota last year. This crop grown near Lincoln, made 1175 lbs. per acre. The lowest report that has been tabulated was 1000 pounds per acre in Iowa, and the highest was 2,085 in Wisconsin and Minnesota.

The oats look like any oat with the hull taken out. They thrash out very readily, with the hulls entirely off, the same as wheat or rye. This means that we have a most excellent feed for baby chicks, young pigs and other stock. It also solves the problem of a food that can be grown on the farm and used without any additional expense. The grain does not lodge and grows on reasonably stout stalks. It does not rust to the extent of serious damage. It matures immediately after Kherson oats and thrashes out as easily as common oats. Remember that one bushel of hulless is equal to two bushels with the hulls on. Sow 50 pounds to the acre.

Price, 1 lb., 35c; 5 lbs., \$1.40; 10 lbs., \$2.25; 25 lbs., \$4.40, postpaid. 50 lbs., \$6.00; 100 lbs., \$11.50, sacked f. o. b. Lincoln.

Alfalfa Seed

Our Dry Land Seed tests 99 1/2% pure and will grow as near 100% as it is possible to get seed to grow. It can safely be depended upon to make an ideal stand and produce an abundant crop of good, rich alfalfa when conditions are at all favorable. Alfalfa seed will, without question, go higher as the season advances. Place your order now. The demand will be heavier this year than ever before. See enclosed price list.

Grimm's Alfalfa

Grimm's is the hardest strain of Alfalfa known in this country. It stools very heavily and the value of this characteristic can hardly be over-estimated as it not only does not winter kill, but the protected underground buds are less liable to injure from over-pasturing. The spreading crown seems to be associated with a very much branched surface root system, in addition to the deep tap-root. This makes surface moisture easily available. Sow 10 lbs. per acre. See enclosed price list.

Ask for Prices on Large Lots.

Gunn's Grimm Type Alfalfa

This is really Grimm Alfalfa but carries no guarantee. We have sold a lot of it around Lincoln and it is giving the finest of satisfaction. It has the same branching roots and low crown as the Grimm. The seed is grown in the far north which makes it perfectly hardy. The price runs lower than Certified Grimm. Sow 10 or 12 lbs. to acre. See inclosed sheet for price.

Cossack Alfalfa

It is much like Grimm. Has the same spreading root system and low crown. Leaves are smaller than common alfalfa. Blossoms all colors. Absolutely hardy.

THAT
GUARANTEE
PROTECTS
YOU

Do you want to enrich your soil so that it will produce better crops of any kind in the future than it has done before?

Then inoculate your seed with McQueen's Inoculator this year. Treat your alfalfa, clovers, vetch, peas, beans and other legumes. It will pay big.

McQueen's Inoculator has an unequalled record of results and it is the hardest and most virile nitrogen-fixing bacteria known.

GARDEN SIZE 20 CENTS

COMBINATION for Peas, Sweet Peas, Garden and Lima Beans.

Grasses

There is a lot of difference in the quality of Grass Seed. We furnish only the high grade, high germinating, free-from-weeds quality. It does not pay you to spend your money for cheap seed of any kind. Your time is worth too much to take the risk. Just leave it to us, and we will furnish you good, suitable seed, and we will tell you the truth.

Brome Grass

It starts very early in the spring, and continues growth until late in the fall. Brome Grass spreads by means of underground rootstalks. As a hay crop, the grass usually furnishes good cuttings for two or three years, sometimes cutting three tons of cured hay per acre. It will furnish the best of pasture for several years.

Kentucky Blue Grass

We sell only the high quality, heavy testing grades. 14 lbs. to bushel.

See price sheet inclosed, or ask.

Canada Blue Grass

This is the Blue Grass of Canada, New York and the New England states. It does better on poor, clayey, thin soil than on rich land. It is smaller, grows closer to the ground and stands cold and drouth better than Kentucky Blue Grass. Has a very blue color and flattish stems. Very attractive, and really a valuable grass. 14 lbs. to bu.

See price sheet inclosed, or ask.

Timothy

Practically all the Timothy that we sell is grown right in this section. We put it through our powerful cleaner, which takes out not only all foul weeds, but the light, immature seeds, as well. Don't plant timothy unless it has been thoroughly recleaned.

Timothy and Alsike

This is a good mixture, when you get good stuff. We are particular on this and only sell good, heavy seed. Don't buy the cheap screening sold as this mixture.

Rye Grass

English or Perennial Rye Grass—This is a regular perennial variety, which is so valuable as a pasture grass, producing, as it does, an abundance of foliage, which will remain bright and green throughout the season. The hay is much relished by all kinds of stock, especially when grown on moist soil.

Meadow Fescue or English Blue Grass

Especially suited for permanent pasture and is also fine for hay. Grows 2 to 3 feet high. The hay is very nutritious and cattle thrive on it, whether dry or green. Succeeds even in poor soil, and as the roots penetrate deep, from 12 to 15 inches, it takes extremely dry weather to affect it.

Orchard Grass—Sure Crop

This is a very early grass and is particularly adapted to shady places. It is a valuable grass for both pasture and hay land, because of its most favorable growing qualities.

Red Top Grass

Fancy Recleaned Solid Seed (14 lbs. to bu.). We do not stock the unhulled or chaff grade, which is always so unsatisfactory. Our high grade seed will produce a dense growth of velvety turf. Very valuable as a permanent pasture grass. It withstands the cold of the northern states, and can be depended upon to flourish almost anywhere. Especially suitable for growing on damp lands. Only 10 pounds needed to sow an acre.

See price sheet enclosed, or ask.

Milo Maize

An excellent grain for dry localities; grain good food for chickens and all kinds of stock; does well any place. Sow 5 or 6 pounds to acre; 2 bushels to acre for hay.

See colored sheet for prices.

Pure Bred Seed Corn

NOTE THIS:

Any seed corn we may furnish you will be the "real stuff." We do not believe in running a crib of corn through the sheller and calling it "seed corn." Neither do we believe in taking ten varieties out of the same bag. No, sir; every bit of corn we sell is furnished us by real seed corn growers. We will not knowingly sell you anything that is not true to name. Every bit of it is tested and will grow under favorable conditions.

IMPROVED REID'S YELLOW DENT—This is one of the very best yellow varieties known in the Corn Belt.

90-DAY BLAIR WHITE

Here is a real 90-day Corn that has real size to it. The ears are pure white and grow from 8 to 13 inches long. All well filled and quite cylindrical.

PRIDE OF THE NORTH—The best extra early yellow corn; ripens in 85 to 90 days; yields 40 to 75 bushels per acre.

SILVER MINE—Probably the very best white corn; ripens in about 100 days; yields up to 100 bushels per acre.

See price sheet inclosed, or write for prices on these and other varieties such as White Cap Yellow, Red Cob White, Minn. No. 13 and Golden Glow.

Sudan Grass

Sow 3 to 5 pounds in rows, or 20 to 30 pounds broadcast.

This makes an ideal crop when one is short of hay and for green feed. Well, you will get tired cutting, for it keeps coming right along, no matter how many times it is cut. It yields as high as 8 tons of hay per acre.

Exhaustive trials have proved that Sudan Grass can be grown almost anywhere. It seems to be unaffected by temperature and grows as well in a cold climate as a hot one. It requires no special quality of soil; black loam clay and sandy loams have all produced uniformly successful crops. Its most valuable quality is its resistance to drouth. In dry or semi-arid sections, it thrives to perfection and yet excessive moisture does not stop its heavy yield. Sow 3 to 5 pounds in rows 30 to 40 inches apart or 20 to 30 pounds broadcast. Cut and feed green or cut for hay as soon as fully headed.

See colored sheet for prices.

Kaffir Corn

The old stand by; used for feeding all kinds of stock and poultry. Sow 2 bushels to acre broadcast for hay.

See colored sheet for prices.

Cane or Sorghum

On account of the sugar contained in the stalks, cane is used a great deal for hay; can be fed to all kinds of stock. Sow 2 bushels to acre broadcast for hay.

See colored sheet for prices.

DU PONT SEMESAN
A Mercuric Disinfectant

For Potatoes, Beans, Corn, Peas and Other Seed On Potatoes it kills scab, black rot, black leg, damping off—thus insuring a large crop.

ON CORN

Prices subject to change.

Gunn's Lawn Grass Seeds For Lawns

Gunn's Velvet Grass Mixture

GUNN'S VELVET GRASS MIXTURE—This is composed of a mixture of grasses recommended by State University Farm as the best mixture for this part of the United States, with the idea of producing not only a desirable lawn with the least possible delay, but a lasting lawn that will give a beautiful velvety appearance, and one that will stand our severe summers. The seeds we use in this mixture are of the highest purity and germination, which makes it a little more expensive, but a great deal more valuable than the common run of grass seed.

You should use about one pound of seed to every 100 square feet, and see that the seed is raked in as early in the spring as possible. Price, per lb., 75c; 5 lbs., \$3.50.

Cannon Blue Grass

PURE MISSOURI GROWN KENTUCKY BLUE GRASS—

Nebraska's Pure Seed Law requires us to sell Blue Grass of a purity of 80 per cent, with a germination of 40 per cent. This Blue Grass the past year tested 97 per cent pure, with a germination of 95 per cent. This year's stock will about equal last year's. It is the best produced; about four grades better than usually sold. Prices: Per lb., 70c; 5 lbs., \$3.25; 10 lbs., \$6.25.

FANCY KENTUCKY BLUE GRASS—

This is the regular grade. It passes the state law. Price: Lb., 60c; 5 lbs., \$2.75.

All Prices Subject to Change.

Golf Greens or Creeping Bent Lawns

This kind of a lawn is very desirable in this climate because it keeps green all summer if watered, fertilized and munched. It will grow on southern exposed terraces and lawns where blue grass and white clover always kill out. There are two ways to get the lawn started—First by

SOWING CREEPING BENT SEED

This is the cheapest way but it takes longer. Prepare soil same as for blue grass and white clover, sow 1 lb. to 100 square feet. Keep well watered. There is no absolutely pure Creeping Bent seed produced. Price, South German Mixed Bent Seed, \$1.50 per pound. Larger lots cheaper.

PLANTING CREEPING BENT STOLONS

This is the method used by most golf clubs on their greens. Creeping Bent Grass from a special nursery is cut up, sowed and covered with soil. The young sprouts start quickly and a new lawn produced right away. We are prepared to put in these lawns the right way. Estimates furnished. See one at N. W. Corner 15th and C, home of Harry T. Dobbins, that we put in late this fall (Oct. 1925).

White Clover Lawn Seed

CANNON BRAND WHITE CLOVER—This is a special White Clover Seed that is grown in Wisconsin. It is practically pure seed, testing better than 99 per cent and germinating right at 100 per cent. It is the best White Clover that can be had. All White Clover Seed very scarce. Price: Per lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.75.

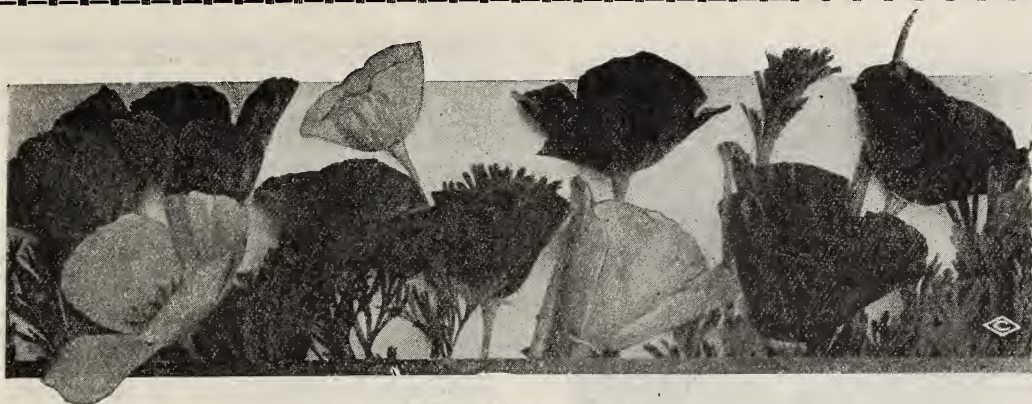

Tried and Proven To Be The Very Best

The Eastridge Country Club, Lincoln Nebraska

THE Eastridge Country Club was laid out in July, 1923. The complete grounds consist of about 110 acres, which is covered with an eighteen hole golf course. In August, 1923, the Board of Directors purchased from us something over \$3,000 worth of our high grade lawn grass seed, and seeded all of the grounds. In 1924 we sold them almost another \$1,000 worth. We have had many compliments on the way in which this seed has grown, which proves the fact that we sell only high grade seed that is sure to grow and give the very best of satisfaction. The first sowing of a lawn with good clean high germinating seed is most important. You sow it to get a stand. You want good seed—seed that is full of life—seed that is free from dandelions, Buck-horn, crab-grass and other weeds. That is the kind we furnished the Eastridge Country Club, and that is the kind we want to furnish you.

It's much better to secure your lawn by sowing our good seed than it is to sod. Sod makes a lawn quicker but it doesn't last because all of the sod does not come in perfect contact with the soil underneath, and the grass dies out for lack of proper root growth.

Poppies Are Fine for Border

Gunn's Fine Flower Seeds

WE SECURE our flower seed from one of the most reliable and most careful importers of flower seeds in the U. S. All of this flower seed is carefully tested, and will grow if you treat it right. See that soil is packed. Use a shade of burlap when starting small flower seed in the sunshine, and don't cover too deep. **DON'T PLANT TOO DEEP.** (Only twice the depth of the seed.)

Flowers are inexpensive, and if you select any of the ones listed below, you are sure to be pleased. **THEY ARE AS EASY TO GROW AS WEEDS.** For flowers all summer long and for all kinds of colors of flowers at all times be sure to plant **SWEET PEAS, HOLLYHOCKS, PINKS, NASTURTIUMS, ASTERS,** and more of the **OLD-FASHIONED FAVORITES.**

Spring Strawberries

SENATOR DUNLAP (Per.)—The best general purpose variety, adapted to all localities. We sell more Dunlap plants than any other variety. Heavy bearer, large, dark red color and excellent quality. A great plant-maker. One of the best varieties for market and home use. A money maker. If you only plant one variety, select this one. The demand for Dunlap plants is large. We expect to have enough plants to fill all orders, but order early to make sure. 50 plants, 75c; 100 plants, \$1.25, postpaid.

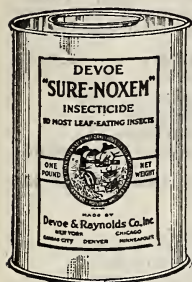

Everbearing Strawberries

The Everbearing Strawberry is a big success. Plants set out in the spring will produce a good crop of berries the same season. The second season they will yield a big crop in the spring and will produce all summer and fall, up until the ground freezes.

PROGRESSIVE (Per.)—A great plant-maker and very prolific, producing berries on new runners as well as mother plants. Dark red clear through and quality the best. Our advice is to plant this variety. Order early. 50 plants, \$1.25; 100 plants, \$2.25, postpaid.

Big Poultry Profits

Do you know just how profitable poultry raising is? Less capital and work are required to make money from your poultry than any other live stock crop. You can turn your money every three to sixteen weeks for eight or ten months why not go into it more extensively? Buy a Queen Incubator and start turning your 3c eggs into 13c baby chicks.

Queen

INCUBATORS

We recommend QUEEN Incubators as the one sure machine to use, and after considerable looking around and experimenting, we have put in a full stock of these machines. The QUEEN has double redwood walls, lined with corrugated strawboard. Pure Copper heating system with all joints and seams locked, hammered and soldered. two-walled metal, asbestos-lined jacket, safety lamp hangers, and many other superior points that are worth investigating. QUEENS turn out bigger hatches of stronger, healthier chicks that live and grow.

No. 5, 400 egg only **\$68⁰⁰**

The Queen is the Only Brooder Stove with Automatic Control of Both Check and Draft

The Queen Colony Brooder is a new and improved design of brooder stove. It is made of highest quality iron castings that will wear and last indefinitely, and is much heavier than other stoves. More iron means more heat and less fuel.

The check rests on top of the stove and opens outward when fire is too warm, thus giving a gentle inflow of air to retard the heat. While the opening of the draft to increase the fire is located at the top of the stove, it opens into the fire at the base through an opening extending down the side to the bottom. This feeds the draft into the fire from underneath with no opening below the hover. (Oil brooders, page 32.)
